EDUCATION

George Mason University Honors College

Bachelor of Science in Computer Science

Fairfax, VA

Aug 2024 – May 2027

EXPERIENCE

AI/ML Fellow

May 2025 – Present

Break Through Tech

Remote

- Engineered a machine learning model with a team of **5 fellows** using Python, pandas, scikit-learn, and TensorFlow, **achieving 92%+ classification accuracy** and improving pipeline efficiency by **30% for a real-world industry challenge**
- Mentored weekly by senior tech engineers** and joined bi-monthly workshops; earned **\$2,000 merit award** and **Cornell certificate** for high-impact project work.
- Completed Cornell's 12-week Machine Learning course** through a **selective AI program (top 3%)**, dedicating **15+ hrs/week** to mastering **supervised/unsupervised learning, model evaluation**, and **end-to-end pipelines**.

Admissions Technical Worker

Apr 2025 – Present

George Mason University

Remote

- Processed and verified **100+ student applications daily** using **Microsoft Excel and Access**, ensuring **99% data accuracy** in the admissions system
- Identified and corrected data discrepancies** by conducting thorough audits, which **reduced processing errors by 30%** over a **two-month period**
- Prioritized and completed **25+ administrative tasks weekly** in a **fast-paced** office environment, supporting **on-time admissions decisions** during peak application season

PROJECTS

Tet Lunar New Year Planner | *React.js, API Integration, Supabase, Git*

Jan 2025

- Designed a responsive user interface** using **React** and cultural Vietnamese themes, which **boosted user satisfaction by 35%** based on survey feedback
- Integrated Google Calendar API** to sync and manage events, **resulting in a 40% increase in scheduling efficiency** for users
- Improved front-end performance** through optimized API calls and responsive design, leading to a **25% increase in cross-device responsiveness**

AI Laptop Recommendation System | *Pytorch, Kaggle, Numpy, Pandas, Git*

Dec 2024

- Implemented collaborative filtering techniques** to streamline recommendations, resulting in a **30% improvement in prediction speed**
- Trained an AI model to analyze pricing patterns**, improving recommendation accuracy by **20%** based on user feedback
- Integrated iterative feedback loops** from test users to refine outputs and reduce bugs by **10%**, **increasing user trust**

Expense Tracker | *Django, Python, HTML, CSS, Git*

May 2024

- Created a Django web application to replace spreadsheet tracking, **resulting in a 40% reduction in manual errors during expense logging**
- Streamlined data handling via CRUD operations**, which enhanced record management efficiency by **30%**
- Designed custom financial reports**, enabling **25% better resource allocation** through actionable insights

TECHNICAL SKILLS

Languages: Python, Java, HTML, Javascript, CSS

Frameworks/Libraries: PyTorch, Django, React.js, Pandas, NumPy, Skikit-learn, Matplotlib

Tools/Platforms: Git, GitHub, VScode, Linux, Wireshark, TCPDump

Certifications: eCornell Machine Learning Foundations, Google IT Support Specialization, IBM Cyber Security Certification, Google Digital Marketing and E-Commerce Certification, Google Data Analytics Certification
